AutoGLUE™

AutoGLUE™ delivers the precision you demand from a modern gluing system coupled with the security of fully automatic integrated glue line inspection. AutoGLUE™ features are designed to help cut make-ready times and actively improve product quality.

Input flap sizes only and AutoGLUE™ takes care of the rest. All glue pattern data for straight line, 4 and 6 corner and lock bottom carton styles is set automatically.

AutoGLUE™ incorporates Leary's patented closed-loop glue detection technology; activated automatically when a glue detection sensor is connected to your LearyARRAY™ system, this patented technology ensures glue placement is not only 'in tolerance' but is perfectly positioned every time.

Contact your local W. H. Leary representative for more information on how AutoGLUE™ can help you assure quality, increase throughput and maximise running speeds.

Enhanced with
LearyNET™
Technology

W. H. LEARY CO., INC. SINCE 1928

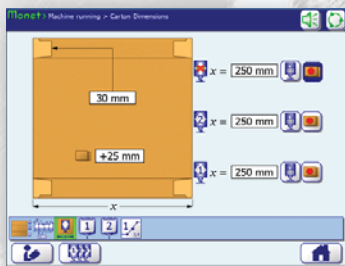

Two great technologies designed to help you achieve more.

AutoGLUE™ Pattern Programming

This feature saves you time by automatically setting the glue line data for you! AutoGLUE™ uses pre-configured, personalised set up data to enable automatic glue valve selection, valve activation and glue line programming.

1. Enter carton flap sizes...

2. Glue pattern is automatically set!

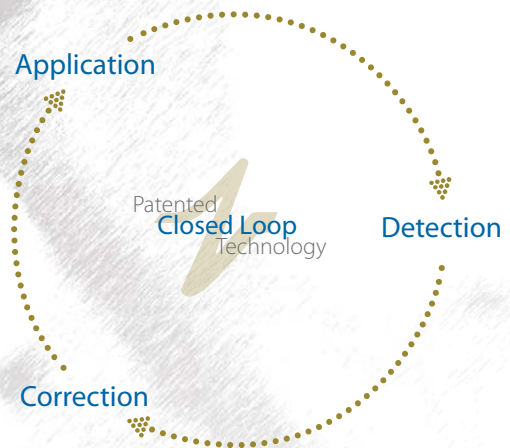

The glue system is made ready in under a minute with our new Monet™ operating system and AutoGLUE™.

AutoGLUE™ Pattern Correction

A truly unique feature only available from W. H. Leary, AutoGLUE™ pattern correction is our patented closed loop glue application, detection and correction technology. Activated as standard where glue application and detection are used on our Array™ systems - the auto pattern correction software compares the detected (actual) glue line with the programmed (required) glue line. If the detected glue line is not perfectly positioned the system will make automatic adjustments to ensure perfect positional accuracy.

With AutoGLUE™, live glue line images are displayed on the touch screen - making it easy to review your glue line positions on the run.

W.H. Leary offers a wide range of gluing and quality assurance solutions. Visit www.whleary.co.uk for details.
