

Simple
Powerful
Control

Copy**GUARD**[™]

The Leary CopyGuard system monitors and detects all standard barcodes. Used with a Leary MS-911 laser code reader, scanning at 2000 reads per second, the system is capable of reading barcodes on lines running up to 600 meters per minute.

Independent scanning trigger, coupled with intelligent software guarantees 100% inspection of each carton. 'Good Read', 'No Read' and 'No Match' conditions are indicated on the display screen. Products with incorrect, unreadable or missing barcodes will automatically shutdown the machine or track the carton for automatic rejection. Set-up is kept to a minimum with a simple 'learn' barcode button.

The CopyGUARD system is IP65 rated making it ideal for use in clean production areas where wash-down routines are completed.

Enhanced with
SecureSCAN[™]
Technology

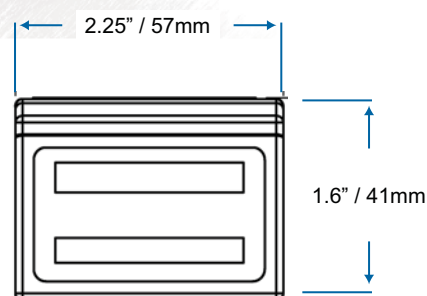

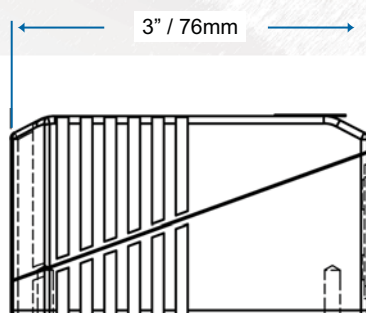

The Leary CopyGuard system is designed to work alongside the Leary MS9-11 Laser barcode scanner. This very high-speed scanner enables code verification at maximum machine speeds.

MS9-11 Barcode Scanner

- Mixed copy detection
- Reads at 2,000 scans per second
- Ideal for high speed applications
- Provides multiple looks at given code
- Raster or single line operation
- Visual status verification
- Easy alignment
- Scan in either 'ladder' or 'picket fence' orientations
- Not effected by carton flutter
- Can be easily moved to scan barcodes in any position on carton
