Control

LearyArray™

The new Leary Array™ series of system controllers deliver in all areas. Capable of handling multiple quality assurance and glue application tasks at the highest machine speeds the Array™ series offers total control at your fingertips. Systems are set up through a large 15" (38cm) colour touch-screen operator interface and utilise Leary's new highly intuitive Monet™ software.

Available in three basic formats the Array™ can be specified as a gluing system, a quality assurance system or a fully integrated gluing and quality assurance controller. Array™ systems can be upgraded at any time in the future, enabling the addition of extra functions as your requirements change.

All Leary Array™ quality assurance controllers operate with SecureSCAN™ technology providing 100% product scanning and fail-safe operation. LearyNET™ remote access and data collection packages are available with all Leary Array™ systems.

W. H. LEARY CO., INC. SINCE 1928

LearyARRAY™

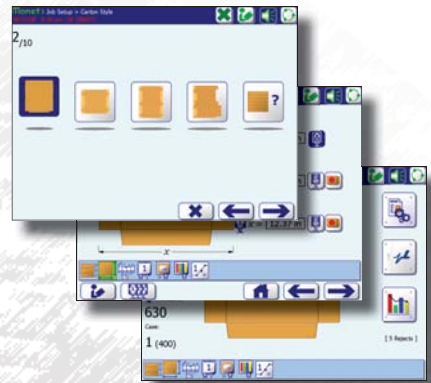

A comprehensive automatic gluing and quality assurance solution.

LearyArray™ controllers deliver precision glue application and fail-safe quality assurance automatically at machine speeds up to 1,200 meters per minute.

Glue application is available in 4/8/16/24 channel versions, with quality assurance options seamlessly integrating into the Array™ as required.

System specifications are set by you the customer, with updates and upgrades possible at any time in the future to expand on the Array™.

Array™ controllers are equipped with Monet™ operating software. This new platform is language neutral, easy to learn, easy to use and enables rapid system set up.
