

Global Remote Assist Data Collection

LearyNET™

LearyNET™ is a combination of two technologies designed to help companies maximise their productivity. Available separately or as a package, both technologies offer significant production advantages.

LearyNET™ remote assist enables Leary technical support personnel to securely access your connected Leary Array™ controller, enabling remote technical support, job set-up assistance, system updates and upgrades – all without needing any specialist in-house knowledge, ensuring that fast, effective assistance is always available. The remote assist package saves you time and money by reducing downtime and the requirement for on-site technical support visits.

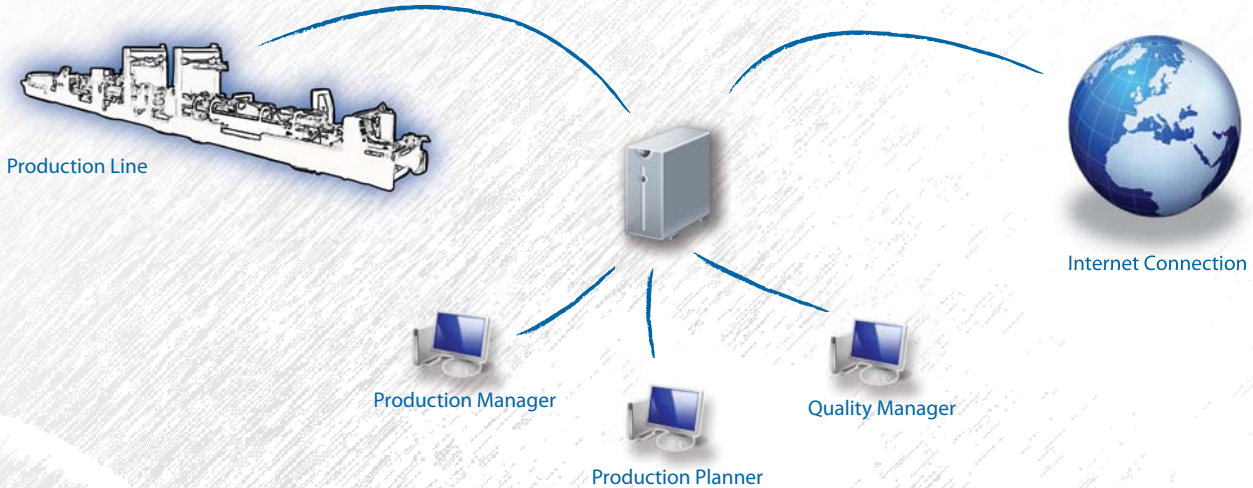

LearyNET™ enables automatic production data collection from the production line where your Leary Array™ controller is installed. Because data is automatically collected, the risk of human error is removed from the process. The information is gathered and held in a Microsoft Access database for easy analysis. High-quality information is gathered including production, waste and spoilage counts, job start and end times, quality information, downtime, uptime and operator login times.

Enhanced with
SecureSCAN™
Technology

Production data collection and remote assistance technologies.

Factory Floor Company Network Remote Connections

Automatic production data collection with LearyNET™

LearyNET™ enables production data to be automatically collected from your production line wherever an ARRAY™ controller is installed. Data is gathered and held in a secure database from where it can be analysed directly, integrated into your existing MIS system or simply viewed using one of the integrated reporting options. Gathered data includes production, waste and spoilage counts, job start and end times, quality information, downtime, uptime, and operator login information.

- Connect up to 8 Leary controllers to the data collection network.
- Production and quality data.
- Up/Down time data.
- Spoilage data.
- Worker data.
- Machine data.
- CAT5 network compatible.
- Automatic data compression.

Access data from anywhere on your network with LearyNET™

LearyNET™ empowers your production team by collecting valuable, meaningful data and making it easily available throughout your company and beyond. Any number of users can access the production data assuming they have been granted access rights. From there, users have the ability to analyse the data and create reports. In addition to local access, users with remote access (to your company network) can access the production data from anywhere in the world!

- Access data from anywhere in the world.
- View near real-time production.
- Easy to use analysis program.
- Production report wizards.
- User-defined production reports.
- Export data to Access, Excel etc.
- Unlimited local users

Access on-line support with LearyNET™

LearyNET™ enables Leary technical support personnel to securely access a connected Leary Array™ system. The remote connection allows Leary to view and assist in job and system set up, diagnose problems and perform remote system updates as they become available. This saves users time and money by reducing downtime and the requirement for on-site technical support visits.

- Get fast Leary technical support over the internet.
- We securely log into your controller to diagnose issues and help users faster than ever before.
- Get system updates remotely.
- Save time and money.

W.H. Leary offers a wide range of gluing and quality assurance solutions. Visit www.whleary.co.uk for details.
