

Jet200™ Micro-Adjust Valve

Jet205™ Fixed Stroke Valve

Jet™ Series Glue Application Valves

The **Jet200™** and **Jet205™** valves are non-contact glue valves capable of handling a wide range of emulsion adhesive viscosities. These valves are ideal for applications where higher viscosity adhesives and higher pressures are required. The **Jet200™** and **Jet205™** valves can be fitted with high, medium or standard pressure systems. Each incorporates multi-point pressure control, back pressure relief and low speed spotting, ensuring accurate volume control over the machines speed range.

The **Jet™** glue valves have additional features designed to reduce set-up times and maintenance:

- Water flushing option to improve system start-ups and reduce maintenance.
- Trigger (photocell) and glue detection sensor can be mounted on the valve.
- Versatile bracketry and carton guides.

- **Jet200™** - Micro-Adjust Stroke
- **Jet205™** - Non-Adjust Valve
- High Accuracy
- High Level of Pattern Performance Consistency
- Fast Response for Pattern Flexibility at High Speeds
- Low Set-Up and Maintenance Times for Increased Efficiency
- Used with High, Medium or Standard Pressures
- Unique Glue Path Design
